ELECTRIC VEHICLE CHARGER REBATE REQUEST

OVERVIEW

As an SRP business customer, you can earn up to \$500 for each Level 2 electric vehicle (EV) charging port you install at your business.

- › A typical Level 2 charging port delivers 240 volts of electricity to the car battery, similar to what a residential dryer or oven uses.
- › Each hour of charge time uses 3–7 kilowatts and will provide 8–20 miles of driving range.
- › The cost for a Level 2 EV charger ranges from \$500 to \$6,000. Factors such as power requirements and siting considerations could impact your equipment and/or installation costs. Consult an electrician to evaluate your specific business needs.
- › The amount of the EV Charger Rebate for each EV charger port is the lesser of (a) the total of the purchase price and installation costs of the EV charger port, or (b) \$500.

For more information on EV charger rebates, visit srpnet.com/evbizrebates or call us at (602) 236-3054.

PROGRAM TERMS AND CONDITIONS

1. Customer Eligibility. To qualify for an EV Charger Rebate under the EV Charger Rebate Program, the applicant (the "Rebate Applicant") must:
 - a. As of the date on which SRP receives the Rebate Request Form (as defined below), and on the date on which each EV charger port is installed:
 - i. Be an SRP retail electric customer, taking service under any general service (non-residential) SRP Standard Electric Price Plan; and
 - ii. Be the SRP Customer of Record or Account Holder of the SRP account at each proposed site of an EV charger port;
 - b. Have the legal right and authority to install the EV charger port(s) at the place(s) of business identified on the Rebate Request Form;

 - d. Submit to SRP a Rebate Request Form, and all other required documentation required under these Program Terms, by July 31, 2020 (rebate eligibility is based on the eligibility rules in place at the time of purchase);
 - e. Install the EV charger port between May 1, 2019, and April 30, 2020; and
 - f. Comply with all rules and requirements in these Program Terms.
2. Equipment and Installation Requirements
 - a. Each EV charger port must:
 - i. Be a UL-listed Level 2 (208/240 V) charger port of any manufacturer, make or model;
 - ii. Have a dedicated circuit;
 - iii. Be new (not used or refurbished) upon installation by or on behalf of the Rebate Applicant;

A licensed contractor can identify what permitting and inspections may be required.
3. Exclusions, Limitations
 - a. Participation in the EV Charger Rebate Program is not available to third-party EV charger port vendors or others engaged in the EV charger port business.
 - b. SRP has established a cap on funds that may be paid for EV Charger Rebates under the EV Charger Rebate Program (the "Rebate Funding Cap").
