PROGRAM CAP
\$300,000 total cap per year, per customer, for all programs.

CUSTOM BUSINESS SOLUTIONS

<p>DESCRIPTION</p>	<p>This program offers the flexibility to identify and implement energy efficiency projects unique to a facility and its operations. If energy savings can be measured, the project probably qualifies. Preliminary assessments are available to qualifying customers to help identify energy-saving opportunities.</p>
<p>WHAT QUALIFIES</p>	<p>Most equipment that reduces annual energy consumption and energy consumption during SRP's summer peak period is eligible. Equipment must not be eligible for a rebate under the Standard program.</p> <p>EXAMPLES:</p> <ul style="list-style-type: none"> • Central plant controls optimization • Compressor replacements in chillers • Upgrading refrigeration compressors and condensers • Conversion from constant air volume to variable air volume • Improvements to the building envelope <p>PRELIMINARY ASSESSMENTS ARE AVAILABLE FOR:</p> <ul style="list-style-type: none"> • Receive electrical service on a qualifying E-60 series rate plan • Non-HVAC pumping systems with at least 25 hp, excluding backup • Data centers larger than 1,000 square feet • Compressed air system between 25 and 100 hp for a leak assessment
<p>REBATES</p>	<ul style="list-style-type: none"> • Equipment: \$0.08 per kilowatt-hour for the first year of electricity savings plus \$300 per average peak kW saved, up to 75% of the incremental custom cost • Pump assessment: Up to \$500 per pump, with a max of \$3,000 • Compressed air system leak assessment: 100% up to \$25 per hp • Preliminary assessment: 100% funded up to \$3,000 • Technical assessment: 50% of the preapproved cost, up to \$15,000; 100% (up to a maximum of \$30,000) if suggested improvements are made
<p>WHEN TO APPLY</p>	<p>Preapproval is required before requesting services or purchasing, ordering or installing equipment. Retrofit and new construction projects are eligible.</p>
<p>KEY BENEFITS</p>	<ul style="list-style-type: none"> • Lower electric bills • Increased productivity and system reliability • Lower maintenance costs • Reduced annual operating expenses • Improved comfort in the workspace • In-depth system analysis for qualifying projects
